The “Professionalism of a Modern SWAT Operator” provides the student with an appreciation of how physical fitness, training and conduct play a vital role in their duties as a tactical operator.

At the conclusion of this 6 hour block of training students will be able to:

Have a complete understanding of the importance of physical fitness such as diet, regular workouts and a healthy lifestyle contribute to a professional standard.

SWAT training must be intense, mission specific, ever changing based on needs and current operational trends. Additionally understand and appreciate the importance of maintaining / attending regularly scheduled team training.

Realize the importance of his conduct with but not limited to fellow teammates, fellow officers, supervisors and the community. Conduct of a professional should not just be limited to when he is in the capacity of an operator but transcends into his patrol duties, investigative duties and his personal life.
